

Aluminium Unit Beams

Industrial Series

Industrial series beams offer compatibility for use within traditional scaffold structures and temporary roofs, they combine medium strength, low weight and low cost. These unit beams are available in one depth 0.45m are manufactured in 1m length increments from 2m to 8m. All horizontal members of these beams are manufactured in traditional scaffold tube size, allowing easy connection of traditional scaffold couplers. Vertical posts are provided at each end of the beam, also beam sizes of 4m and above include additional intermediate vertical posts. Beams are joined end to end using a simple steel spigot connector.

Industrial beams offer an economic solution for the creation of beam spans, crash decks and medium size temporary roofs.

Technical data

Maximum bending moment=15.7kNm, Maximum shear force=13.5kN

For additional strength and/or versatility ask for ASP's **SPECIALIST SERIES** beams, available in 45cm and 73cm depths and 1, 2, 3, 4, 5, 6 & 8m lengths.
