

PREGUARD ADVANCED GUARDRAIL SYSTEM

- HARNESS ATTACHMENT, NOT NEEDED when erected from a boarded lift below
- PROVIDES EDGE PROTECTION, for construction of next lift in safety
- ATTACHES TO STANDARDS, fixed double guardrails not required, use for inside face too
- PORTABLE SYSTEM, take from job-to-job, limited capital investment
- DESIGNED TO FIT ALL, tube and fittings as well as popular system scaffolds
- TELESCOPIC HANDRAIL SYSTEM, fits a range of bay sizes
- TWIST-TO-LOCK GUARDRAILS, for safe handling and transport
- SIMPLE ALUMINIUM CONSTRUCTION, for reliability in tough working conditions
- VERY ROBUST AND EASY TO USE compared with alternatives
- UNIQUE AUTOMATIC FOOTPLATE just tilt to unlock
- QUICK-LOCATING SPRING-LOADED CLAW, massive strength, easy to move

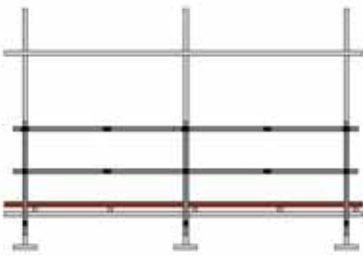

Collective means of fall prevention as recommended by SG4:05 and WAHR

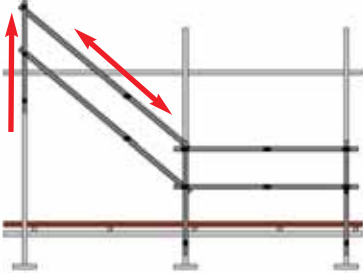

PREGUARD ADVANCED GUARDRAIL SYSTEM

ASP Part No	Description	Closed length (min bay)	Extended length (max. diagonal)	Weight	Fits Bay Sizes* *2.0m lift height
24101200	PreGuard Post			5.3kg	
24111800	Telescopic Guard Rail	1.80m	3.4m	3.2kg	1.80 - 2.57m
24111500	Telescopic Guard Rail	1.50m	2.8m	2.5kg	1.50 - 1.80m

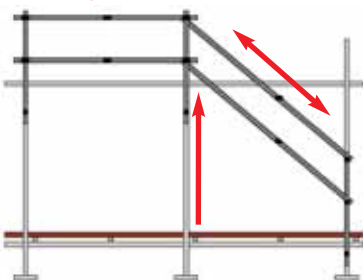

Step 1

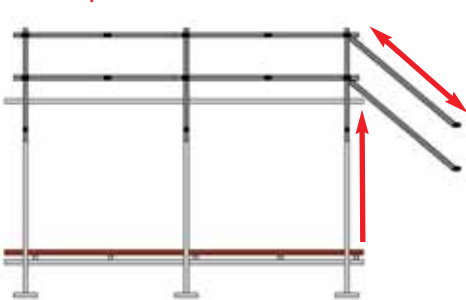

Step 2

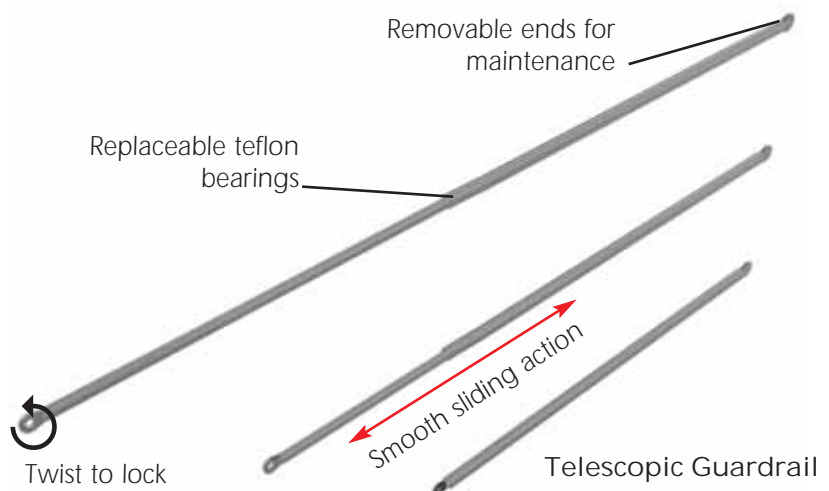

Step 3

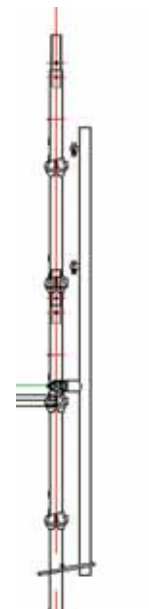

Step 4

PreGuard is a telescopic advanced guardrail system as defined in SG4:05 providing collective fall prevention for scaffolders when erecting, dismantling or altering scaffolding. Such systems do not completely eliminate the risk of a fall and personal fall protection equipment will still be required unless every lift is a fully boarded lift

PreGuard Post

Works with popular systems
