30190002	XTENDA 2 bd insert only	All	-	-	0 - 2	1.90kg
30190003	XTENDA 3 bd insert only	All	-	-	0 - 3	2.80kg

XTENDA Transoms are suitable for the following scaffold types:

- Facade Access.
- Inspection, Lightweight, Medium and Heavy Duty Scaffolds.
- 1, 2 or 3 inside boards, fully loaded.
- 4 board wide scaffolds.
- 5 board wide scaffolds.
- System scaffolds 1.0 and 1.22m wide.

XTENDA inserts are removable and fully interchangeable.

2 and 3 inside board inserts are available, identified by different end plates.

For full technical details ask for the XTENDA Data Sheet available from ASP or see our website.

XTENDA Intermediate Transoms are also available to special order with a single wedge connection at the outside only, making it adaptable to a variety of scaffold widths - ask ASP for details.

Look out for the introduction of the unique XTENDA Transom which combines the structural integrity of a "Ready Lock" transom with a telescopic inside board support.
